WINDOW KIT

Perfect integration into the window jamb

Product informations

Kit for installing the air inlet/outlet of single-room heat recovery units in the window jamb. It offers a discreet, elegant solution that preserves the appearance of building façades.
The kit is made of high-quality ABS with a stainless steel grille for long-lasting reliability and weather resistance.
It comes complete with a sealing gasket for safer installation and consistent performance over time.
The kit is available in **160 mm** and **200 mm** diameters only.
