SLOT-IN SYSTEM

Standard model without condensate drain tray

Product informations

SLOT-IN is a system for supporting external units.

Product features

- made of high-strength thermoplastic material
- the ground supports are stackable and allow multiple applications in height, complete with vibration-damping moulded gasket for floor support
- the connecting bar allows variable lengths and depths

Advantages

- rapid installation
- possibility of ground anchoring
- adjustable in height, length and depth
- eliminates vibrations transmitted from the outdoor unit to the supporting surface
- customisation of the system thanks to its modular components

The kit consists of

- 4 floor supports H 158 mm, complete with anti-vibration rubber
- 2x548 mm bars
- nylon screw kit

SLOT-IN system

Also available is the kit of 4 ground supports H 130 mm complete with fittings (**SKU 12231**) and the 8-bracket kit for fixing to the floor (**SKU 12232**).
