# GROUND SUPPORTS

Adjustable with fixing pin pressure

## Product informations

Adjustable ground supports with fixing pin pressure.

**Supplied in packs of 4 pieces**

## Product features

- equipped with a joint at the top of the foot, which allows the support to adapt to the inclinations of the surface where the outdoor unit is to be installed
- there is an NBR rubber seal on the underside of the supports, which provides greater stability on the ground
- there is an NBR rubber gasket at the top of the supports to absorb vibrations from the outdoor unit, profiles, structures, etc...

## Technical Features
