ANTIFREEZE KIT

Constant power heating cable against frost, with thermostat and schuko plug - 10 W/m

Product informations

The ***ANTIFREEZE KIT*** consists of a 10 W/m constant power heating cable complete with contact thermostat and Schuko power supply cable; it guarantees excellent protection from freezing and avoids possible damage caused by low temperatures on pipes, valves, taps, water meters, drinking troughs, vases and small tanks.

Warnings

- if coiled on a pipe the cable must never overlap
- it is advisable to fix the cable with K50 tape for steel pipes or K50AL for plastic pipes
- to have an effective system it is advisable to apply an insulating coating over the heating cable

Technical Features

NOMINAL VOLTAGE	230 V
POWER TOLERANCE	± 2,5 W
OPERATION	THE CABLE STARTS OPERATING WHEN THE CONTACT TEMPERATURE DROPS BELOW + 5°C AND AUTOMATICALLY SHUTS DOWN WHEN THE TEMPERATURE EXCEEDS 15°C
