

ATOM LIQUID PURIFYING

Scented purifier for ultrasonic nebulizers

Product informations

Perfumed purified **Atom liquid**, specially developed for ultrasonic nebulizers, this type of delivery avoids the phenomenon of condensation that occurs when a liquid is nebulized through the use of heat; the particles have a size of less than 5 µm and therefore do not settle on the surfaces, in this way the product is totally propagated throughout the A/C system.

Product features

- refreshes and improves indoor air quality
- it purifies rooms up to 20 square meters
- purifies the components of the A/C system and vehicle interiors
