KIT BENDING PIPES PROBES

Comfortable and smooth at all phase

Product informations

Bending probe kits, in plastic material and round profile, are characterized by a high flexibility and a remarkable consistency that allows the bending of the copper pipe without creating harmful narrowing; comfortable both during insertion/extraction from the pipe and when bending thanks to their smooth structure.

You will obtain perfect bends even without removing the insulation and without the fear of crushing!

The kit includes

- 5 m probe for copper pipe Ø 1/4"
- 5 m probe for copper pipe Ø 3/8"
- 5 m probe for copper pipe Ø 1/2"
- 4 m probe for copper pipe Ø 5/8"
- comfortable ABS case
