BUILT-IN BOX IN SHEET METAL

Built-in box for gas distribution in galvanized sheet metal with manifold

Product informations

Box with plastic bottom and metal lid, particularly suitable for use outside the home; in fact, it allows to connect the manifold to the gas pipe by making the latter run outside the wall without placing it under the track, as required by legislation by various Italian municipalities.

Product features

- reversible lid
- resistant to site shocks
- equipped with ventilation holes
- complete with 3 or 4 way manifold
