BUILT-IN KIT

for SPECTRE-Pro

Product informations

The SPECTRE-Pro VMC system offers maximum installation flexibility thanks to the recessed installation kit, which is sold separately. The kit reduces the system's wall profile to just 6 mm, ensuring a sleeker design that blends seamlessly into the surroundings.
The dedicated formwork facilitates pre-installation and, thanks to its cover, protects the system from construction debris during the building phase.
The kit is universal and is therefore suitable for both 100 mm and 160 mm diameters.
