

PH SAFE

Neutralization cartridge

Product informations

PH Safe is the neutralization cartridge designed to effectively treat condensate produced by gas condensing boilers.

Product features

- is capable of neutralizing up to 800 liters of acidic condensate with pH3
- prevents corrosion of concrete, plastic parts and metal parts
- contributes to environmental friendliness
- avoids limestone sludge accumulation and consequently frequent cleaning is not required
- thanks to its small size, it can be used for wall or floor standing boilers
- its neutralizing capacity remains constant over time
- due to its transparency, the level of consumption remains visible
- water inside the pump tank creates a siphon, limiting the risk of desiccation

Technical Features

| | |
|--|--------------------------------------|
| <i>MAXIMUM ACIDITY OF CONDENSATE</i> | PH > 3.0 (GAS CONDENSING BOILERS) |
| <i>MAXIMUM VOLUME OF CONDENSATE</i> | 800 LITERS |
| <i>MAX BOILER POWER</i> | 25KW |
| <i>ESTIMATED DURATION (EVEN LONGER, DEPENDING ON THE ACTUAL PH AND VOLUME OF THE CONDENSATE)</i> | 12 MONTHS |

PH Safe

| | |
|---------------------------------------|---------------------|
| INLET PIPE DIAMETER | Ø EXTERNAL 15-17 MM |
| MAXIMUM CONDENSATE TEMPERATURE | 65°C (80°C - 1 MM) |

| SKU | MODEL | PRICE |
