# CENTRIFUGAL PUMP WITH HIGH FLOW RATES

Flowtank model

## Product informations

**FLOWTANK**, the centrifugal pump with high evacuation flow rates, designed for application in showcases, refrigerated counters and air conditioners with or without a collection tank, where the condensation water is particularly full of impurities.

## Product features

- reversible tank that allows the installation of the pump in all configurations and compact for easy accommodation in small spaces
- with input adapter to avoid all problems of connecting the boiler to the pump
- high performance
- universal, disconnectable electrical connection for easy installation and maintenance

## The kit includes

- FLOWTANK centrifugal pump
- power/alarm cable
- outlet adapter Ø 6/9 mm
- screws and plugs

## Technical Features

|              |                  |
|--------------|------------------|
| POWER SUPPLY | 230 V 50 HZ 65 W |
