CHARGE VALVE

Complete of pins and cap

Product informations

Charge valve complete of pins and cap.

Recommended fitting conditions

To prevent damage to the mechanism, remove the same before brazing

Pressure resistance

- **operating pressure** is the maximum pressure under which the core plunger can be operated without being deteriorated during the opening-closing movement
- **static pressure** is the maximum pressure under which the mechanism can safely still in the closed position during its life; it may be called also working pressure

Refrigerants compatibility

Internal mechanisms are suitable for refrigerants *HCFC, HFC and R744*.

Lubricants compatibility

Internal mechanisms are suitable for lubricants *PAG, POE and MO (mineral oil)*.

Typical applications

- *Sku 11525*: highly recommended for all the most typical applications
- *Sku 11749*: has an internal spring, and consequently easier/stronger to handle
