FLOWITA MONOBLOC PUMP

For condensate drain

Product informations

FLOWITA is the monobloc wall pump designed for the evacuation of condensate from air conditioners up to 10 kW; thanks to its essential design it can be integrated into any type of environment.

Product features

- all components are removable
- equipped with a large tank that allows the pump to perform optimally, larger and less frequent pumping cycles
- extremely silent
- supplied with screws and dowels

Technical Features

POWER SUPPLY	220-240 V 50-60 HZ
MAXIMUM FLOW RATE	13,2 L/H
MAX DISCHARGE	10 M
ELECTRIC POWER	19W
TANK CAPACITY	170 ML
POWER CABLE LENGTH	0,8 M
