WEEKLY DIGITAL CHRONOTHERMOSTAT

CR028/B model

Product informations

The weekly chronothermostat suitable for all heating and/or cooling systems, equipped with a backlit display to monitor all its functions in real time.

Product features

- **pre-programmed at the factory** for operation defined as standard
- easy to use thanks to menu navigation
- 2 winter and 2 summer programmes with 3 temperature levels + antifreeze are already set in its permanent memory
- the temperature scale is set in Centigrade (Celsius) with the possibility of calibrating the room temperature measurement by setting a correction value (- 3°C to + 3°C); by switching to Fahrenheit degrees, all temperature displays are updated according to the new scale
- offers the possibility to connect a separate removable temperature sensor (optional) and then set it according to your system requirements: remote, floor and external
- avoids energy waste thanks to its temporary or permanent manual override with autonomous temperature SET of the current weekly programme
- equipped with a 4.3" backlit touchscreen LCD display
- automatic summer time changeover
- suspension key for cleaning
- user and installer passwords
- timed backlighting
- relay status indication
- correction t detection depending on product wall mounting and/or semi-recessed

Weekly Digital Chronothermostat
