DIGITAL THERMOMETER/HYGROMETER

With Bluetooth® wireless technology

Product informations

The digital thermometer/hygrometer with Bluetooth® wireless technology works with the ***Mastercool Connect* app** to remotely provide dry bulb, wet bulb temperature and relative humidity. Thanks to the possibility of seeing the change in performance parameters in real time, this device will allow the refrigerant charge in the system to be varied; the thermometer is equipped with a convenient clip and can be attached to a vent or fins for even more accurate results.
