ANTIBACTERIAL FLEXIBLE DUCT

double wall

Product informations

DOUBLE WALL ANTIBACTERIAL FLEXIBLE DUCT - 10 M

Insulated flexible duct with outstanding thermal and acoustic insulation properties, completely **PVC-free** and therefore **100% recyclable**. It is constructed from a durable multi-layer polypropylene fabric wall, reinforced with an encapsulated steel wire spiral helix, providing a smoother inner surface.

The inner duct wall is laminated with an environmentally friendly liner featuring **antibacterial and anti-fungal** properties.

Use: Air distribution ducts, including applications in hospitals and cleanrooms

Technical Features

WORKING TEMPERATURE	-30°C ÷ + 60°C
LENGTH	10 M
FIRE REACTION	-
ANTIBACTERIAL	ACCORDING TO ISO 846, CLASS A AND C
MAX PRESSURE	UP TO 1000 PA
MAX AIR VELOCITY	4 M/S

Antibacterial flexible duct
