ELECTRONIC DAILY CHRONOTHERMOSTAT

Model CRONOMIX-S

Product informations

Cronomix-s, the extremely intuitive programmable electronic daily chronothermostat, equipped with a cavalier clock to choose which of the two temperature levels to activate at a specific time; easy to set but technological thanks to the TPI operating (*optional*) which exploits thermal inertia.

Product features

- ideal for installation in homes or offices
- the temperature is adjusted via two knobs which manage the comfort or reduced temperature
- guarantees energy and economic savings and an ErP contribution of 4%
