# ELECTRONIC LEAK DETECTOR

Model HLD 200+

## Product informations

***HLD 200+*** is the most reliable negative polarity halogen corona leak detector on the market; easy and practical to use, it is ideal for all halogenated refrigerant gases (including chlorine and fluorine).

## Product features

- adopt advanced, low power consumed, eight-bit microprocessor controller
- dual-color led indicator lights with progressive and real time display
- modular sensor, thanks to the seven alarm levels indicated on the led display
- modular sensor, covenient for maintenance
- test with automatic reset of the starting of the leak detector
- battery charge indicator
- detects gas leaks containing ethylene oxide for sterilization equipment in hospital settings
- supplied in a practical case, with 1 spare sensor already present inside and 2 AA alkaline batteries included

## Technical Features

| | |
|---|---|
| *TYPE OF SENSOR* | NEGATIVE CORONA SENSOR |
| *MINIMAL SENSITIVITY* | ≥ 3 G/YEAR |
