## ELECTRONIC LEAK DETECTOR

Model HLD 200+

### Product informations

**HLD 200+** is the most reliable negative polarity halogen corona leak detector on the market; easy and practical to use, it is ideal for all halogenated refrigerant gases (including chlorine and fluorine).

### Product features

- adopt advanced, low power consumed, eight-bit microprocessor controller
- dual-color led indicator lights with progress and real time display
- modular sensor, thanks to the seven alarm levels indicated on the led display
- modular sensor, convenient for maintenance
- test with automatic reset of the starting of the leak detector
- battery charge indicator
- detects gas leaks containing ethylene oxide for sterilization equipment in hospital settings
- supplied in a practical case, with 1 spare sensor already present inside and 2 AA alkaline batteries included

### Technical Features

TYPE OF SENSOR	NEGATIVE CORONA SENSOR
MINIMAL SENSITIVITY	$\geq 3$ G/YEAR

## Electronic Leak Detector

<b>ADJUSTABLE SENSITIVITY</b>	SEVEN ALARM LEVELS INDICATED BY THE LED DISPLAY
<b>ALARM LEVELS</b>	SEVEN LEVELS OF VISUAL AND AUDIBLE ALARM
<b>SENSOR TIP LIFE WITH CONTINUOUS OPERATION</b>	OVER 50 HOURS UNDER NORMAL SENSING CONDITIONS
<b>ENVIRONMENTAL CONDITIONS</b>	<ul style="list-style-type: none"> <li>• TEMPERATURE 0°C ÷ + 52°C</li> <li>• HUMIDITY &lt; 95% RH (NOT CONDENSING)</li> </ul>
<b>PROBE LENGTH</b>	305 MM
<b>DIMENSIONS</b>	175X55X34 MM
