# FILMAX ANTICORROSIVE

For the protection of thermal system

## Product informations

Liquid with protective, filming and anticorrosive function for both traditional and latest generation multimetallic thermal systems; added to the water circulating in the system, it also eliminates the thermal and gaseous stresses caused by the coupling of various materials.

*Supplied in practical 1 and 5 l tanks.*

### Product features

- it protects common metals and all plastic materials that make up the system from oxidation and corrosion
- contains an effective biocide capable of preventing, or in any case reducing, the development of algae and biological products inside the plantc
- it can be mixed with common anti-freezers
- null foaming power
- **when using the product, use protective systems**
- **avoid contact with eyes and skin**
