FISCAL TURBINE GAS METERS

Model TRZ2

Product informations

TRZ2, fiscal turbine gas meters particularly suitable for their high measurement accuracy, stability over time and their compact design; designed for testing systems, given their high precision and reproducibility, their turbines are particularly suitable for use as sample counters.

Materials

Depending on the pressure used, the case is constructed of ductile iron, steel, or welded steel; these meters meet stringent safety standards and are fireproof (HTB). For greater precision, the impeller is made of aluminum.

Product features

- turbine gas meters with measuring cartridge
- standard flow rectifier
- thermowell on the gas meter case *(optional)*
- verified and certified by the national metric office
- PTB and European (CEE) and international approvals
- suitable for natural gas, refinery gas, town gas, butane, ethylene, air, nitrogen and other gases on request
- high frequency pulse generator *(optional)*
- absolute ENCODER S1 *(optional)*

Technical Features

SIZE	G 65 - G 1000
FLOW RATES	5 - 1600 M^3/H
RATIO	1:20
NOMINAL DIAMETERS	DN50 - DN150
PRESSURE RANGE	PN 10 - 16 AND ANSI 150 - 600
LENGTH	3 DN
DEGREE OF PROTECTION	IP67 (PROTECTED AGAINST SHORT IMMERSIONS, UP TO 1 M DEEP AND COMPLETELY HERMETIC AGAINST DUST AND FUMES)
COMPLIANCE	MANUFACTURED IN ACCORDANCE WITH DIN EN ISO 9001:2000 (DIN EN ISO 14001), AND MEET EUROPEAN REQUIREMENTS AND INTERNATIONAL RULE (EN 12261, OIML, ETC..)
