FLOAT SWITCH WITH COUNTERWEIGHT

For white waters

Product informations

Float level regulator insensitive to humidity and condensation, designed to activate the connected equipment (pumps, sirens, etc..) when a set level is reached.

Product features

- watertight up to 100 m depth with electric contacts and microswitch / commutator
- micro-switch switch
- injection of non-hygroscopic closed-cell polyurethane foam, which eliminates any residual air inside the regulator body and hermetically seals the regulator itself
- **mercury free**
- equipped with a 110 g counterweight

Technical Features

OPERATING VOLTAGE	230 VAC 50 HZ
RATED VOLTAGE MAX	10 (4) A 250V A.C.
MAX PRESSURE	10 BAR
ELECTRIC CONTACT	SPDT COM + N.C. + N.0
WORK ANGLE	30°
