FOAMING PURIFYING TREATMENT

Foaming purifying treatment for air conditioners

Product informations

Foamy treatment for cleaning the air conditioning filters to be carried out at least twice a year, before switching on in summer and in winter; this treatment is also particularly suitable after a new installation of an air conditioner, because it eliminates the impurities accumulated during assembly and storage in the factory.

Product features

- Specific for the sanitation of evaporators
- Suitable for any surface
- Removes germs, allergens, environmental dirt, fingerprints, halos and grease
- Ready to use
