GENIUSBOX

The only embedded box with integrated siphon!

Product informations

GENIUSBOX is the only embedded box with integrated siphon for the passage of the pipes of the air conditioning system under the floor, without using the duct. The box must be positioned inside the wall, behind the split and, thanks to its large capacity, allows easy positioning of the condensate drain pipe; also complete with "Fix dima" to be anchored to the bottom of the predisposition and with support pins to facilitate the installation of the box.

Product features

- equipped with two side outlets Ø 20 mm and a reduction for pipe Ø 16 - 18 mm
- supplied with insulating band to prevent condensation from forming in the face of critical operating temperatures
- made of first choice shockproof PS
- for the dimensions consult the technical drawing
- *ideal for new construction or renovations works*
