PIERCING VALVE

For pressure control in refrigerant circuits

Product informations

Piercing valve designed for pressure control in refrigerant circuits; once installed, it allows the copper pipe to be perforated and creates a permanent service outlet for any further work on the circuit.

Technical specifications

- hexagonal key included
- the valve seal is designed to provide 50 times more sealing area than conventional O-ring types
- the extremely hard needle that drills the tube is designed to ensure perfect positioning
- requires only 5 cm of space for installation and operation

Technical Features

MAXIMUM PRESSURE	34 BAR
PIPE DIAMETER	1/4" - 5/16" - 3/8"
MATERIAL	ZINC

SKU	MODEL	PRICE
00000011629	PIERCING VALVE	€15.25 VAT EXCLUDED
