IDEA.X.13

Hand-held electronic system of vacuum and charge

Product informations

Connecting ***IDEA.X.13*** only one time to the system is enough to carry all the operations of vacuum and charge out, without ever disconnecting it from the system; all procedures will be shown on the display and they will allow the operator to finish the installation or the system check without mistakes chance. *IDEA.X.13* is a patented system which will revolutionize your way of working. A single equipment for all refrigerants, accurately to the gram.

Product features

- small dimensions
- system check-up and immediate reading of vacuum and charge
- gram accuracy
- easy to use
- works with all kind of cooling gas, even with bigger than 2 kg tanks
- applicable on every model of vacuum pump

System composed of

- block balance and detection
- hose for 1/4" SAE condensing flow service join and 5/16" SAE adaptor
- capillary F 1/4" SAE x F 1/4" SAE to bypass vacuum pump - *IDEA.X.13*
- adaptor 5/16" or 1/4" SAE x 1/8" NPT M
- 2 button batteries
- pratical ABS shock proof bag
