JAB CLEANER

Concentrated perfumed detergent for air conditioners

Product informations

JAB, fast-acting perfumed concentrated cleaner for total internal cleaning of units, also acts on plastics but without damaging them; formed by a biodegradable and non-aggressive composition, also suitable in environments with food presence. Thanks to the special trigger, it can be dispensed both in liquid form for better penetration of the product between the fins of the heat exchanger, and in foamy form for greater adherence to plastic surfaces.

Product features

- also suitable for the H.A.C.C.P.
- biodegradable
- specific for A/C systems and plastics
- to be diluted in water up to 1:5, on the basis of dirt to remove
