ELECTRONIC LEAK DETECTOR

Model TG410. Suitable for A1, A2L and A3 refrigerant gases and hydro-nitrogen

Product informations

Electronic leak detector Mod. ***TG410***, equipped with an air suction system for faster response and greater sensitivity in leak detection.

Product features

- can be used for air conditioning systems
- uses a next-generation semiconductor sensor that is sensitive to all refrigerant gases
- microprocessor control with advanced digital signal processing
- 3 levels of sensitivity
- 7-LED tri-color leakage level indicator
- audible alarm with variable intensity
- 40 cm flexible probe
- low battery indication
- automatic shutdown
- resetting of environmental concentration
- supplied with hard case and test vial
