LIQUIDBLUE 100

Corrosion inhibitor, antiscalant and biocide

Product informations

Solution for the complete protection of corrosive phenomena and limescale in boilers and heating systems, including those equipped with aluminum components.

Benefits

- prevents oxygen corrosion
- prevents oxide deposits
- specific for copper, steel and aluminum alloys
- inhibits the proliferation of bacteria and by-products
- easy to handle
- of simple analytical determination
- contains activity indicator
- contains no exhaust limiting substances

Application and Dosage

LiquidBlue 100 can be introduced into the system by the dosing pump, feed tank or other convenient point in the circuit. The optimal dosage for correct system protection is *1 liter for every 100 liters of water in the system.*
