# MODULAR SUPPORT SYSTEMS WITH GROUND BASES 460 KG

Modular support systems P 1 m – 1 unit

## Product informations

Adjustable and modular support for supporting condensing units for large roof or ground systems such as VRV and VRF units; designed to reduce the vibrations transmitted by the machines and distributes the weight on the ground without damaging the underlying surface.

*Also present is the version with stainless steel condensate drain tray.*

## Technical Features

<b>PAYLOAD</b>	460 KG
