PARAFFIN BAND

For the protection of the pipes

Product informations

Paraffin band for the protection of underground pipes from stray currents, chemical, atmospheric and environmental agents.

Product features

- almost total versatility of application as it can be used in the points defined as impossible
- it maintains its plasticity and inalterability over time
- impervious to water (including saline), and gases
- given its parafinose composition it is chemically inert and therefore compatible with all materials used in construction, including metals of all kinds and plastic polymers such as PE, PP, PES, PVC, ABS, PU etc.

Technical Features

DIELECTRIC RIGIDITY	> 20 KW
RESISTANCE TO UV RAYS	DISCRETE
WORKING TEMPERATURE	- 50°C ÷ + 60°C
THICKNESS	1,4 MM
IMPERMEABILITY	WATER - GAS
