PIPE IN STAINLESS STEEL AISI 316

Equipped with a yellow protective sheath for the external connection of civil and industrial gas equipment

Product informations

INDOOR flexible pipe to be used for fixed appliances, such as stoves, ovens, hobs, outdoor heaters, kettles and water heaters.

Installation

1. Cut the domestic pipe to the required size and remove the PVC sheath until at least 4 grooves of the steel pipe are exposed
2. Insert the nut, leave a groove exposed at the end of the pipe and insert the washer
3. Recess the nut into the first groove using the plunger
4. Insert the gasket and complete the female connection; a nipple adapter can be used if a male connection is required

The ***INDOOR*** pipe can be installed in non-visible points such as:

- penthouses
- basements
- interior and exterior spaces and wall surfaces

Technical Features

NOMINAL PRESSURE	0,5 BAR
MAX. WORKING TEMPERATURE	120°C
