PLASTICIZED SPIRAL PVC PIPE

With smooth interior and anti-crushing spiral

Product informations

Self-extinguishing plasticized PVC sheath according to *UNI-CIG 7129, D.M. 21/4/93 and law n° 1083*, very flexible and with rigid shockproof PVC spiral with anti-crushing reinforcement; the completely smooth interior makes it easy to use, also avoiding any possible gas stagnation, unlike corrugated or compatible sheaths which, not being smooth internally, make use difficult.

Product features

- it protects the duct pipes, isolating them from stray currents
- high resistance to atmospheric agents and chemical aggressors
- it has a thermal insulating function, absorbing the thermal expansion of the pipes
- excellent resistance to crushing
- smooth interior

Technical Features

WORKING TEMPERATURE	- 15°C / + 60°C
DIAMETRI DISPONIBILI	Ø 20 MM - Ø 25 MM - Ø 30 MM - Ø 35 MM - Ø 40 MM - Ø 50 MM - Ø 60 MM
AVAILABLE DIAMETERS	25 M
