

PUMPS FOR WASHING PLANTS

Descaling pumps

Product informations

Descaling pumps used for the elimination of calcareous deposits from boilers, circuits, boilers etc; equipped with shockproof tank made of acid-resistant plastic material.

Product features

- the compact and ergonomic shape makes it easy to use and transport the pump
- all housings and joints are O-ring sealed to protect equipment from acid vapors
- suitable for use with any cleaning product (acid, alkaline or neutral)
- equipped with flow reverser which is activated by acting directly on the valve, choosing the desired direction for cleaning
