QUICK COUPLING CONNECTIONS

Straight and angled for all types of refrigerant gas

Product informations

Straight and angled couplings that allow the connection and release of the flexible piping to the condensing unit service tap, without refrigerant gas and oil leaks.

*Replacement gaskets also available (**sku 100014 / 100015**).*

Caratteristiche del prodotto

- suitable for any type of refrigerant gas
- single coupling supplied with female bushing and corresponding coupling
- for TR422B and R407C gases: F 1/4" SAE - M 1/4" SAE connection
- for R410A and R32 gases: F 5/16" SAE - M 1/4" SAE connection
- ***unsuitable for performing vacuum operations***
