

RECOVERY STATION

Model approved for flammable refrigerants A2L and A3

Product informations

Recovery station for all refrigerant gases, **including flammable refrigerants of class A2L, A3 and R410A**; the recuperator has an oil-free twin-piston compressor, a high-pressure safety switch and two 2.5" pressure gauges in an ergonomic central position for easy reading. The purge valve ensures 100% removal of the refrigerant, and, thanks to the large fan and condenser, the recovery process is extremely fast. Furthermore, the sealed casing excludes the loss of refrigerant during the recovery process. The recuperator is supplied with an HDPE case to protect it from impacts.

Product features

- *approved for all CFC, HCFC and HFC refrigerant gases and the flammable refrigerants A2L and A3*
- equipped with oil-free double piston compressor
- high-pressure safety switch
- simple internal structure designed for professional use
- high volume recovery capacity
- can be used with any type of refrigerant, including R410A
- injection moulded high-density polyethylene shell for maximum durability
- large, ergonomically positioned pressure gauges for easy reading
- front part fitted with bumpers to reduce possible damage to control knobs

Technical Features

COMPRESSOR	DRY 1/2 HP
POWER SUPPLY	220V 50-60 HZ

Recovery Station

WORKING TEMPERATURE	0°C ÷ 50°C
CONNECTIONS	1/4" SAE
DIMENSIONS	457X356X254 MM (WXHXD)
WEIGHT	12.8 KG

SKU	MODEL	PRICE
00000011709	RECOVERY STATION - 1 PCS.	€4672.5 VAT EXCLUDED
