DUAL STAGE LOW PRESSURE REGULATOR

FE model, flow rate 10-25-50 kg/h

Product informations

Dual stage low pressure regulator for gas and LPG ***FE model***, complete with relief device, minimum and maximum downstream pressure, flow limiter and inlet filter; designed with a dual stage regulation system with a balanced first stage, which combined with a lever second stage, guarantees a constant downstream pressure value as the inlet pressure varies.

Also available the kit of change setting springs (*sku 40104*) and the conical fitting for installing the regulator (*sku 40100*).

Product features

- works with low differential pressure
- equipped with overpressure block valve and underpressure block valve
- double regulation stage with balanced first stage shutter
- integrated filter
- suitable for outdoor installations
