REVOPRO

For chemical products insertion

Product informations

Revopro is a quick and precise gun for inserting chemical products into the system; thanks to the graduated syringe, in fact, it is possible to insert even a minimum quantity of product (from 1 to 5 ml); moreover, the *Revopro adapter* with non-return valve (*SKU 11432*) allows to insert chemical products even in loaded systems (max 5 bar).

30 ml Multigas leak stop cartridge (SKU 11493)

- useful for detecting micro-leaks
- compatible with all refrigerants and lubricants
- it does not contain polymers
- it does not react to humidity
- it does not damage the compressors

30 ml multigas revitalizing Cartridge (SKU 11496)

- ideal for increasing the performance of old systems
- compatible with all refrigerant gases
- it is able to reduce the outlet air temperature of the A/C systems (by - 2°C ÷ + 4°C)

Revopro adapter (SKU 11432) with 1/4" non-return valve and 5/16" adapter.
