SAFETY VALVE FOR WATER HEATER

With/without lever for manual opening control

Product informations

Safety valve for water heaters, designed to ensure correct pressure inside the boiler and direct the water flow in one direction.

Available in the version with lever for manual opening control (SKU 70192 / 70193), or without (SKU 70190 / 70191).

Product features

- it maintains the direction of the fluid, so that it moves only towards the outlet pipe
- adjust the pressure to avoid damage to the system
- protects the water heater, fittings and pipes from sudden changes in pressure

Technical Features

MATERIALS	<ul style="list-style-type: none"> • UNIT: CW617N BRASS • SPRINGS: STAINLESS STEEL • SEALS: "NON-STICKING" SYNTHETIC RUBBER
THREAD	ISO 228 CYLINDRICAL GAS CONNECTIONS
CONNECTIONS	Ø 3/8" MF - Ø 1/2" MF
MAX TEMPERATURE	95°C
CALIBRATION PRESSURE	6 ÷ 10 BAR

Safety Valve for Water Heater

DIMENSIONS

- Ø 3/8" - 40 X 50 MM (HXW) - SKU 70190
- Ø 1/2" - 41 X 52 MM (HXW) - SKU 70191
- Ø 3/8" 40 X 50 MM (HXW) - SKU 70192
- Ø 1/2" 41 X 60 MM (HXW) - SKU 70193

SKU	MODEL	PRICE
00000070190	SAFETY VALVE - Ø 3/8" MF	€5.5 VAT EXCLUDED
00000070191	SAFETY VALVE - Ø 1/2" MF	€6.95 VAT EXCLUDED
