# SEALANT MADE WITH P.T.F.E.

Low coefficient of friction

## Product informations

Anaerobic sealant for sealing metal joints, such as gas, GPL, compressed air, oil and fuels, industrial fluids, CFC, water and various chemicals; thanks to its low coefficient of friction it ensures easy assembly, and even after years the ease of disassembly.

## Product features

- it replaces tapes of P.T.F.E. and hemp
- it resists shocks and vibrations, thermal changes and maintains its sealing properties over time
- easy screwing thanks to the low coefficient of friction
- permanently elastic - removable

**NB.** To seal PVC, PP or Nylon fittings, **use only P.T.F.E. based sealant** (SKU 50950 / 50951) by **pre-treating** the plastic threads with **the activator** (SKU 50959), **screw and tighten within 1 minute** (longer waiting times can break the sealant film that is already forming. **Do not use the thread sealer** on ABS and polycarbonate threads, for other types of materials ask in advance for our technical opinion.

## Technical Features

| MAX Ø FOR USE 2" - CLEARANCE 0,3 MM |                           |
|-------------------------------------|---------------------------|
| COLOR                               | WHITE                     |
| SURVEY                              | FLUORESCENT IN BLUE LIGHT |
