## SHUT-OFF SOLENOID VALVE FOR NAPHTHA

Model MN 28

### Product informations

Electrically operated automatic sectioning valve for naphtha (opens when subjected to voltage and closes when it is removed), this solenoid valve is specially designed to be reliable even in the most severe working conditions, having a large passage section and therefore low head losses.

### Product features

- the construction consists of a die-cast aluminum structure, viton sealing elements and the parts in contact with the fluid, in brass and stainless steel
- the valve remains open only in the presence of electricity
- it is able to work continuously even in ring circuits with pressure differential between upstream and downstream from 0 to 8 bar
- the instantaneous opening and closing allows the application of this solenoid valve even where a precise dosage of fluids is required

***Replacement coils and connectors also available.***

### Technical Features

USE	NAPHTHA
-----	---------

## Shut-Off Solenoid Valve for Naphtha

<b>OPERATING TEMPERATURE</b>	- 5°C ÷ + 60°C
<b>POWER SUPPLY</b>	230 V / 50-60 HZ (SINGLE-PHASE ONLY, THE APPLIANCE DOES NOT WORK IF POWERED WITH THREE-PHASE VOLTAGE)
<b>MAXIMUM VISCOSITY</b>	8 E
<b>PROTECTION</b>	IP65 (PROTECTED AGAINST JETS OF WATER PUMPED FROM ANY DIRECTION AND COMPLETELY SEALED AGAINST DUST AND FUMES)
<b>THREADED CONNECTIONS</b>	<ul style="list-style-type: none"> <li>• DN 20 (SKU R01150)</li> <li>• DN 25 (SKU R01151)</li> <li>• DN 32 (SKU R01152)</li> <li>• DN 42 (SKU R01153)</li> <li>• DN 50 (SKU R01154)</li> </ul>
