SUPER DRY ULTRA

Anti humidity additive for air conditioning and refrigeration systems

Product informations

Super Dry Ultra is a dehydrate additive that able to prevent the formation of humidity in refrigeration and air conditioning systems, thanks to its content of lubricant-stabilising components.

The single pack contains a syringe with additive, 1 flexible adapter, 1 1/4 "SAE adapter and 1 5/16" SAE adapter.

Product features

- helps to avoid the risk of corrosion and freezing in various parts of the system
- prevents acid formation and reduces system maintenance costs as it increases the efficiency of the lubricant in the compressor
- does not damage the filter drier because it contains no solid parts
- ***compatible with all CFC , HFC and HCFC lubricants and refrigerant gases***

Technical Features

- 6 ml dose is for AC/R systems up to 21 KW - 6 kg refrigerant gas
- maximum permitted dilution is 1:125 (1 part SUPER-DRY ULTRA per 125 parts compressor oil)
- formula stabilises the lubricant and absorbs water only 1/5 of the volume of its previous composition

Super Dry Ultra
