SYSTEMS CLEANING PUMP

Pump with healing and loading function

Product informations

Professional sanitizing-detergent and heated pump suitable for cleaning, sanitizing and draining summer and winter air conditioning systems.

Product features

- suitable for dissolving sludge, slag, metal oxides and mucilage of bacterial origin
- structure made of a single tank in reinforced shockproof polyethylene, with peripheral impeller pump
- equipped with flow reverser, useful for particularly clogged systems allowing the circulation of the mixture in both directions, thus increasing the effectiveness of the treatment
- inside the pump there is a 2 kW electric resistance which allows the mixture to be preheated, increasing its effectiveness and reducing intervention times
- provided with 2,5 m reticulate pipe with 3/4" F connections

Technical Features

TANK MATERIAL	POLYETHYLENE
TANK CAPACITY	35 L
VOLTAGE AND FREQUENCY	230 V / 50 HZ
ABSORBED POWER	650 W / 0,8 HP
FLOW RATE	60 L/MIN
CONNECTIONS	3/4"
