SYSTEMS CLEANING PUMP

Pump with heating and loading function

Product informations

Professional sanitizing-detergent and heated pump suitable for cleaning, sanitizing and draining summer and winter air conditioning systems.

Product features

- suitable for dissolving sludge, slag, metal oxides and mucilage of bacterial origin
- structure made of a single tank in reinforced shockproof polyethylene, with peripheral impeller pump
- equipped with flow reverser, useful for particularly clogged systems allowing the circulation of the mixture in both directions, thus increasing the effectiveness of the treatment
- inside the pump there is a 2 kW electric resistance which allows the mixture to be preheated, increasing its effectiveness and reducing intervention times
- provided with 2,5 m reticulate pipe with 3/4" F connections

Technical Features

<i>TANK MATERIAL</i>	POLYETHYLENE
<i>TANK CAPACITY</i>	35 L
<i>VOLTAGE AND FREQUENCY</i>	230 V / 50 HZ
<i>ABSORBED POWER</i>	650 W / 0,8 HP
<i>FLOW RATE</i>	60 L/MIN
<i>CONNECTIONS</i>	3/4"

Systems Cleaning Pump

<i>MAX PRESSURE</i>	6 BAR
<i>MAX TEMPERATURE</i>	60°C
<i>DIMENSIONS</i>	650 X 350 X 400 MM
