DIGITAL THERMO-HYGROMETER

Model with remote probe

Product informations

Digital thermo-hygrometer, the ideal instrument for monitoring microclimatic conditions; designed to measure both temperature and relative humidity in the environment.

Product features

- suitable for use in industrial environments, laboratories, warehouses, food companies, HVAC..etc.
- sensitive sensor for accurate measurement
- practical design, thanks to the spring that allows the probe to reach even the tightest places
- rapid sampling time
- overload alarm
- min/max last data memory function
- retention of recorded data
- backlit LCD display
- auto power-off function
- low battery indicator
