TILTED ROOFING WITH LEAD BASE

For coaxial system

Product informations

Element to connect the roof of the building to the flue, guaranteeing the absolute impermeability of rainwater; thanks to its particular shape it can be used on roofs with slopes ranging from 5° to 30°.

For use only in combination with the coaxial roof terminal COPVCTT6010 (Ø 60–100 mm) and COPVCTT8012 (Ø 80–125 mm).
