Product informations

FastPipe® is the revolutionary multilayer flexible pipe in composite material that allows to overcome the traditional use of copper pipe in connection operations of split air conditioning systems.
What characterizes this innovative pipe is certainly the speed of installation: in fact, a few simple, operations are sufficient to create a fully functional connection system between the two units.

Thanks to ***FastPipe***® it will be possible to work in complete safety: the materials are of high quality and certified according to the strictest European regulations.
Furthermore, compared to copper pipe which can be easily damaged on site,

FastPipe® is also resistant to construction site abuse!

Without forgetting that a flexible and easy to handle hose, capable of adapting to any situation, thus satisfies every installation need.

The hose is 100% made in Italy and is periodically subjected to tests by external bodies to guarantee maximum performance.

The hose also complies with the following regulations

- Global compliance with regulations: **UNI EN 1736:2009 (EN 1736:2008)**
- Coating (thermal conductivity): **UNI 8457 - UNI 9174**
- Coating (fire resistance): **UNI EN 1382:2014 - UL 94:2001**
- Resistance to permeation: **EN 1736 Top Performer Classe 1**
