TURBO SET 90

Autogenous welding system

Product informations

TURBO SET 90 is the smallest autogenous welding system with non-refillable cylinder and cartridge, in a metal trolley.

The kit consists of

- cylinder *OXYGEN* of 1l 110 bar
- cylinder *MAXY GAS*
- *MIGNON* oxygen reducer and gas valve with double protection non-return valves
- pipes connected by 2 m with double protection valves
- Handle with regulating taps and built-in oxygen and gas check valves
- nozzle and tip 80 lt
- 4 pointed star monobloc 63-100-160-165 lt for precision micro-welds
- safety glasses - multipurpose wrench
- igniter
- filler metal with flux

Technical Features

UTILIZATION GAS	• OXYGEN • MAXYGAS
MAX FLAME TEMPERATURE	3000°C
SECURITY SYSTEMS	2 NON-RETURN VALVES INSERTED ON REDUCER AND TAP AND 2 ON FLAME TORCH
